

Evaluation Strategy

The Immigration Partnership (IP), through the work of the Evaluation Advisory Committee (EAC), a subcommittee of Council established in 2016, is developing an ongoing performance measurement (PM) strategy as mandated by Council.

According to the Centre of Excellence in Evaluation¹, a PM strategy is a "results-based management tool that is used to guide the selection, development and ongoing use of performance measures".

Purpose Statement

The EAC is dedicated to develop and support a PM strategy to:

- Continually monitor and examine the contributions of the activities of the Steering Groups and Council in achieving IP's mandate.
- Examine the effectiveness of the processes and structure of IP in achieving IP's mandate.
- Support strategic learning by using data to inform decision-making and strategy in a dynamic environment.

Research Questions

Long term outcomes

Intermediate outcomes

Immediate outcomes

Outputs

- 1. Are the social, economic and health conditions of immigrants and refugees in the community improving?
- 2. Are immigrants and refugees using settlement and nonsettlement services and are these responsive to their needs?
- 3. Are immigrants and refugees participating in the local labour market?
- 4. Are immigrants and refugees participating in the broader community and developing a strong sense of belonging?

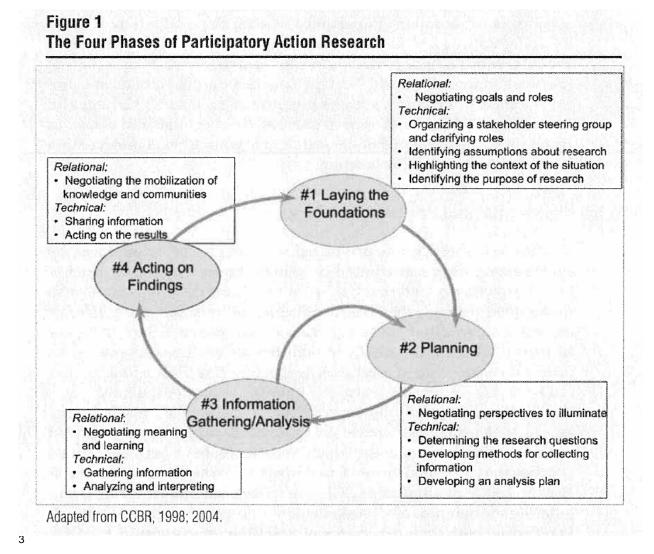

Is the Immigration Partnership making a difference in the...

- 5. ability of partners and stakeholder to respond to newcomer needs;
- 6. capacity of employers to hire immigrants/refugees:
- 7. ability of municipalities and broader communities to welcome and support newcomers.
- 8. To what extent are engagement, connections and collaboration among partners facilitated by IP?
- 9. To what extent are education and advocacy on immigrant and refugee settlement, employment and belonging facilitated by IP?

Using reflective practice

The PM strategy will include planning, action and reflection in an ongoing *reflective* action cycle as seen in the figure below. Using a reflecting action cycle will contribute to ongoing learning and adaptation to our dynamic settlement context.²

Under the influence of the EAC, the Immigration Partnership has developed a results framework (Appendix A) that will guide its evaluation and performance measurement. It is anticipated that this framework will evolve as the Partnership and its evaluation develop.

Methodology and timeline

The Immigration Partnership strives to take a mixed-methods approach to evaluation. The approach will include both primary and secondary data collection and both qualitative and quantitative research.

Method	Frequency					
Quantitative data						
Partner survey To assess partner engagement and IP's facilitation of the work of partners and other stakeholders (research questions 5-10) and progress in achieving Community Action Plan results (research questions 2-8). Includes all members of the Council, Steering Groups, and staff (Goal: 80% response rate).	Annual					
Community survey To gather community input on the experiences in bringing immigrants/refugees (research questions 2-4), examine trends in the social, economic and social participation of immigrants/refugees in our local context (research question 1), and IP's contribution to the work of partners and other stakeholders' positive change (research questions 5-10; goal: 300 immigrant/refugee respondents)	Bi-annual					
Statistics Canada To collect statistically representative data on the current state of immigrants and refugees in Waterloo Region (research question1)	Collected every 5 years. Next avail early 2018					
IRCC To collect local immigrant/refugee data on yearly arrivals and service use (research question 2)	Annual					
Qualitative data						
Community reflection To reflect on the current social, economic and health conditions of immigrants and refugees in Waterloo Region (research question 1; goal: 500 interactions at community events throughout the year).	Annually depending on identified needs					
Focus groups To more deeply explore anticipated/unanticipated and interesting findings in surveys and other data, and data that is not available through other methods (Goal: 2-4 focus groups, 5-10 participants, including sector stakeholders from each Steering Group and immigrants and refugees)	Annually depending on identified needs
